# Inflation vs Target

Current headline against central bank targets — as of May 2026

## INFLATION COMPARISON

| Metric              | Tanzania    | Kenya       | Rwanda      |
|---------------------|-------------|-------------|-------------|
| Headline Inflation  | 4.2%        | 6.7%        | 12.9%       |
| Central Bank Target | 3.0% – 5.0% | 2.5% – 7.5% | 2.0% – 8.0% |

**Investment read-through:** Tanzania offers the most stable inflation environment (4.2% within target) supporting real returns and currency stability. Kenya's headline at 6.7% is approaching the danger zone — CBK correctly paused easing. Rwanda's inflation crisis at 12.9% is the #1 risk factor for BK Group — eroding real wages, squeezing borrowers, and forcing aggressive rate hikes that will compress NIMs and potentially spike NPLs.

## POLICY DIVERGENCE & BANKING IMPLICATIONS

**Tanzania** — hike to cool surging credit (+23.2%) and rising inflation (4.2%). Most proactive central bank. Banks face modest NIM compression but asset quality pristine (NPL 2.9%).

**Kenya** — Further 25bps cut to 8.75% but paused as inflation climbed to 6.7%. Credit recovering (+9.3%). Major watch item: NPLs surged to 15.3% — highest in East Africa — posing provisioning risk.

**Rwanda** — Aggressive +100bps tightening as inflation hit 13.0% . CBR now 8.25% — highest in 3 years. Banks face rising funding costs and potential asset quality deterioration.
